

## **DMM-50mV/50A External Shunts (fits Wavetek and Fluke)**

The AGRA DMM 50mV/50 is an external shunt designed for use with all standard digital multimeters. Simple plug-in attachment provides high current measurements capability with minimal effort. The inconvenience of handling loose test leads connected to a remote shunt is eliminated. This device is a must for the corrosion technician or engineer involved regularly in measuring current which exceeds the input rating of the meter. Conversion calculations are made easy due to the one to one ratio of the shunt.

- Current: 50 A
- Voltage: 50 mV
- Dimensions: 3-1/2" long x 1-1/8" wide
- Weight: 2 oz
