

Easybond Reach System (EBRS)

A technique of making sound retrofit electrical connections to buried pipelines, without the need for major excavation. The Easybond Reach System (EBRS) comprises a special pin brazing gun with a purpose designed brazing tool that attaches to a fully adjustable (1.6m to 2.5m) hollow extension tube constructed of aluminium.

Battery Pack Chargers

'Vepac' Car Charger

'Elite' Standard Charger

BAC Microprocessor controlled battery chargers are designed to provide fast, automatic charging and ensure peak performance from your batteries.

- Short circuit shutdown without blown fuses
- Reverse polarity protection
- 3-Stage charge CI-CV-Float
- Fast constant current bulk charge
- Constant voltage proportion timing for minimal gas emission
- Constant voltage float/standby
- Independent overrun (fault) timer - digital electronics for stability & reliability
