“Rust Never Sleeps”

GMC STAPERM™ Contact Eliminator Reference Casing

Quality You Can Trust.

The GMC "Contact Eliminator" is designed to be used in areas where electrode to earth electrical contact is questioned. Its body is a standard 2 ½" dia. x 6' long Schedule 40 PVC special slotted casing. The slotted end of the casing has a special permeable ½" thick casing seal designed to retain moisture around the casing. The casing is filled with GMC "Fast-Gel" (a special low resistivity non-organic contact mud NSF-60 APPROVED). The casing "Contact Eliminator" Kit comes with the 6' sealed casing, 2 ½" dia. casing plug with ¼"-20 threaded studs for testing (T/S) and "Fast-Gel" non-organic mud powder.

Features

- 2 1/2" dia. x 6' long Schedule 40 PVC with special slotted casing.
